Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I in the reply filed on 5/6/05 is acknowledged.

Claims 20-24 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/6/05.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ford (USPN 5,937,749) in view of Pelletier (USPN 5,447,758) and French (GB 2,176,226 A).

Ford discloses a silk screen printing frame having an upper and lower support. The upper frame has right and left portions for holding down the workpiece and is pivotally connected to the lower support. Additionally, the upper frame has clamping mechanism, that is, a slot and bolt assembly for holding down the frame. The inner area

Art Unit: 1725

of the upper support is used to apply a decoration on the workpiece. A workpiece pad, or fabric platform is placed on the support platform. (abstract, figures, col. 2, lines 42-67, col. 3, col. 4, lines 1-59)

Ford does not teach the decoration of louvered blinds or the use of a laser.

Pelletier disclose the screen printing process applied to Venetian blind slats. (abstract) It would have been obvious to one of ordinary skill in the art at the time of the invention to decorated Venetian blinds, as taught by Pelletier, in the Ford silk screen clamping frame because it is merely a variation on silk screened products.

French discloses the decoration of a Venetian blind using laser irradiation. (abstract) It would have been obvious to one of ordinary skill in the art at the time of the invention to use laser irradiation for Venetian blind decoration, as taught by French in the Ford and/or Pelletier devices because this is merely an alternative decoration application.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
